DESCRIPTION

The low cost 2N3958 JFET dual is designed for high-performance differential amplification for a wide range of precision test instrumentation applications. This series features tightly matched specs, low gate leakage for accuracy, and wide dynamic range with I_G guaranteed at $V_{DG} = 20$ V.

The hermetically-sealed TO-71 package is available with full military processing (see Military Information and the 2N5545/5546/5547JANTX/JANTXV data sheet).

For similar products see 2N5196/5197/5198/5199, the low-noise U/SST401 series, the high-gain 2N5911/5912, and the low-leakage U421/423 data sheets.
